

Full Syllabus & Course Overview

A beginner-to-advanced course covering Computer Fundamentals, Keyboard Skills, MS Word, MS Excel, MS PowerPoint and Canva — designed for students, job seekers, office staff and business owners who want real, job-ready computer skills. No prior experience is needed.

Detail	Info
Duration	6 Weeks
Level	Beginner to Advanced
Mode	Online classes
Certificate	Yes, on completion

What You'll Learn

- Computer Fundamentals — parts of a computer, operating systems, files & folders
- Keyboard Typing & Shortcuts — accurate, confident typing speed
- MS Word — professional documents, CVs, reports and letters
- MS Excel — data entry, formulas, functions and simple reports
- MS PowerPoint — professional presentations that don't look like slideshows from 2005
- Canva — social media and marketing creatives, no design background needed
- File Management, Printing & PDF Creation — everyday office workflows
- Online Productivity — email, cloud storage, and working with digital documents

Who This Course Is For

Students, job seekers, office staff and business owners who want real, job-ready computer skills — whether you're preparing for your first office job, brushing up for a career change, or running your own small business.

What You'll Be Able to Do

- Create professional documents, reports and presentations with ease
- Build and understand Excel spreadsheets and simple reports
- Design social media and marketing creatives using Canva
- Handle everyday office tasks: file management, printing, PDFs
- Apply for office, admin and data-entry roles with confidence
